

TABLE OF CONTENTS

	Page
ACKNOWLEDGMENTS	iii
AUTHOR INDEX	iv
 Session A: Climatologies	
A1 A Long Term North Atlantic Wave Hindcast; Val R. Swail, Atmospheric Environment Service, Downsview, Ontario; V.J. Cardone and A.T. Cox, Oceanweather, Inc.	1
A2 Results of WASA Wave Hindcast; Heinz Gunther, W. Rosenthal, M. Stawarz, GKSS Forschungszentrum Geesthacht, Geesthacht, Germany; J.C. Carretero, M. Gomez, I. Lozano, O. Serrano, Clima Maritimo, Madrid, Spain; M. Reistad, Det Norske Meteorological Institut, Bergen, Norway	17
A3 Evaluation NCEP/NCAR Reanalysis Project Marine Surface Wind Products for a Long Term North Atlantic Wave Hindcast; Andrew T. Cox and V.J. Cardone, Oceanweather, Inc., Cos Cob, CT; V. R. Swail, Atmospheric Environment Service, Downsview, Ontario	30
A4 Wave Climate on the British Columbia Coast; Diane Masson, Institute of Ocean Sciences, Sidney, British Columbia	*41
A5 Analysis of Hurricane Cycles in Florida; Lithwa Lin, U.S. Army Engineer Waterways Experiment Station, Vicksburg, MS; and R.G. Dean, University of Florida, Gainesville, FL	42
A6 Wave Climate Studies for Sebastian Inlet; William R. Dally and L.E. Harris, Florida Institute of Technology, Melbourne, FL; W.G. Grosskopf, Offshore and Coastal Technologies, Inc., Avondale, PA	56
A7 Wind-Wave Climate of the Black Sea and the Turkish Coasts (NATO TU-WAVES Project); Erdal Öozhan and S. Abdalla, Ocean Engineering Research Center, Middel East Technical University, Ankara, Turkey	71
 Session B: Deep Water Modeling	
B1 WAM Validation of Pacific Swell; Paul A. Wittmann, Fleet Numerical Meteorology and Oceanography Center, Monterey, CA; W.C. O'Reilly, Naval Post Graduate School, Monterey, CA	83

*abstract only - full paper not available

B2	Hindcasting Waves from Storms in the Tasman Sea; <i>Andrew K. Laing and S.J. Reid, National Institute of Water and Atmospheric Research, Wellington, New Zealand</i>	88
B3	Intercomparing Third-Generation Wave Model Nesting; <i>R. Padilla, P. Osuna, J.Monbaliu, Hydraulics Laboratory, K.U. Leuven de Croylaan, Hervelee, Belgium; L.H. Holthuijsen, Delft University of Technology, Delft, The Netherlands</i>	102
B4	Wind-Wave Modeling in Waters with Restricted Fetches; <i>Henrik Kofoed-Hansen, International Research Centre for Computational Hydrodynamics, Horsholm, Denmark; H.K. Johnson, Danish Hydraulic Institute, Horsholm, Denmark; J. Hojstrup and B. Lange, Riso National Laboratory, Roskilde, Denmark</i>	113
B5	Integration of Source Terms in WAM; <i>Julia Hargreaves and J.D. Annan, Proudman Oceanographic Laboratory, Birkenhead, Merseyside, United Kingdom</i>	128
B6	Comparison of Four Wave Prediction Models; <i>Carlos Sanchez and A. Contreras, Comision Federal de Electricidad, Mexico; R. Silva and G. Govaere, Instituto de Ingenieria, Mexico</i>	134

Session C: Measurements

C1	Real-Time Wave Data Collection System at Sebastian Inlet, Florida; <i>Lee E. Harris, B.J. Winder, M.C. Perry, Florida Institute of Technology, Melbourne, FL; E.F. Childress, Woods Hole Group, Cataumet, MA</i>	146
C2	High-Resolution Directional Wave Measurements from Air-Sea Interaction Spar Buoy in the Gulf of Mexico; <i>Mark A. Donelan, H.C. Graber, W.M. Drennan, University of Miami, Miami, FL; E.A. Terray, Woods Hole Oceanographic Institution, Woods Hole, MA</i>	*154
C3	Separation of Seas and Swells from NDBC Buoy Wave Data; <i>David W. Wang, Computer Sciences Corporation, Stennis Space Center, MS and D. Gilhousen, National Data Buoy Center, Stennis Space Center, MS</i>	155
C4	Measurement of Winds and Waves from A Nomad Buoy in High Seastates; <i>S.G.P. Skey and K. Berger-North, Axy's Environment Consulting Ltd; and V.R. Swail, Atmospheric Environment Service, Downsview, Ontario</i>	163

Session D: Shallow-Water Modeling

D1	Wave Modelling in the Great Barrier Reef: Incorporating Sub-grid Scale Effects; <i>Thomas Hardy, L.B. Mason, and J.D. McConochie, James Cook University, Queensland, Australia</i>	176
-----------	---	-----

*abstract only - full paper not available

D2	Use of Coupled Numerical Wave Models to Simulate the Littoral Environment from Deep Water to the Beach; <i>Rick Allard and L. Hsu, Naval Research Laboratory, Stennis Space Center, MS; J.M. Smith, U.S. Army Engineer Waterways Experiment Station, Vicksburg, MS; M. Earle and T. Mettlach, Neptune Sciences, Inc.; K. Miles, Sverdrup Technology, Inc., Stennis Space Center, MS</i>	187
D3	Modeling Waves at Ponce de Leon Inlet, Florida; <i>Jane McKee Smith, A. Militello, S.J. Smith, U.S. Army Engineer Waterways Experiment Station, Vicksburg, MS</i>	201
D4	Comparing the Second-Generation “HISWA” Wave Model with the Third-Generation “SWAN” Wave Model; <i>Nico Booij, L. H. Holthuijsen, I.J.G. Haagsma, Delft University of Technology, Delft, The Netherlands</i>	215
D5	A Verification of the Third-Generation Wave Model “SWAN”; <i>Leo H. Holthuijsen, R.C. Ris, N. Booij, Delft University of Technology, Delft, The Netherlands</i>	223

Session E: Source Terms

E1	Modeling of Effectiveness of Wave Damping Structures in Wadden Sea Areas; <i>Hanz D. Niemeyer and R. Kaiser, Coastal Research Station of the Lower Saxonian, East Frisia, Germany</i>	231
E2	Wave Hindcasts Forced by Scatterometer Wind Fields; <i>William M. Perrie, B. Toulany, and M. Dowd, Bedford Institute of Oceanography, Dartmouth, Nova Scotia</i>	239
E3	Shallow Water Wave Modeling with Nonlinear Dissipation: Application to Small Scale Tidal Systems; <i>Christoph Schneggenburger, H. Gunther, and W. Rosenthal, GKSS-Forschungszentrum Geesthacht, Geesthacht, Germany</i>	242

Session F: Nonlinear Interactions

F1	Wave-Wave Interactions in A New Coastal Wave Model; <i>Ray-Qunig Lin and W. M. Perrie, David Taylor Model Basin, Bethesda, MD</i>	256
F2	Nonlinear Source Function in the Coastal Wave Model; <i>Ray-Qunig Lin and W. Kuang, David Taylor Model Basin, Bethesda, MD</i>	262
F3	New Perspective on Three-Wave Resonant Interactions in Shallow-Water Ocean Surface Waves; <i>A.R. Osborne, Dipartimento di Fisica Generale dell'Universita, Torino, Italy and M. Petti, Dipartimento de Ingeneria Civile, Sezione Idraulica, Firenze, Italy</i>	269
F4	5 Wave Interactions in the Spectra Surface Waves; <i>Valeri A. Kalmykov, John Hopkins University, Baltimore, MD</i>	284

*abstract only - full paper not available

F5 Swell Evolution in the Sea of Finite Depth; <i>Valeri A. Kalmykov, John Hopkins University, Baltimore, MD</i>	292
F6 Numerical Computations of the Nonlinear Energy Transfer of Gravity-Wave Spectra in Finite Water Depths; <i>Noriaki Hashimoto, H. Tsuruya, and Y. Nakagawa, Port and Harbour Research Institute, Ministry of Transport, Nagase, Yokosuka, Japan</i>	301

Session G: Prediction Systems

G1 Use of Two NCEP/NCAR Reanalysis Products to Hindcast the Wave Climate at Nome Alaska; <i>Jon Hubertz, Applied Coastal Modeling, Vicksburg, MS and W.A. Brandon, U.S. Army Engineer Waterways Experiment Station, Vicksburg, MS</i>	322
G2 Comparison of Model Output of Wind and Wave Parameters with Spaceborne Altimeter Measurements; <i>P.A. Hwang, W.J. Teague, G.A. Jacobs, Oceanography Division, Naval Research Laboratory, Stennis Space Center, MS; S.M. Bratos and D.T. Resio, U.S. Army Waterways Experiment Station; D.W. Wang, Computer Sciences Corporation, Stennis Space Center, MS</i>	335
G3 Impact of the Assimilation of ERS-1 and ERS-2 Data Into A North Atlantic Regional Version of WAM; <i>Laurie J. Wilson, Environment Canada, Dorval Quebec; E. Dunlap, ASA Consulting Limited, Halifax, Nova Scotia; R. Olsen, Satlantic, Inc., Halifax, Nova Scotia</i>	344
G4 SEA21 - Forecasting Operability of Marine Installations; <i>Michael Stiassnie and Michael Glozman, Coastal and Marine Engineering Research Institute, Technion City, Haifa, Israel</i>	352
G5 A Wave Forecasting System for the Spanish Harbors; <i>J.C. Carretero, M.G. Lahoz, E.A. Fanjul, M.A. Alfonso-Munoyerro, J.D.L. Maldonado, Clima Maritimo, Puertos de Estado, Madrid, Spain</i>	367

Session H: Coupled Predictions

H1 A 2-D Wave Energy Spectrum Model in Shallow Water; <i>K. Angelidis and C. Koutitas, Aristotle University of Thessaloniki, Thessaloniki, Greece</i>	381
H2 Use of Phase-Revolving Numerical Wave Models in Coastal Areas, <i>James M. Kaihatu and L. Hsu, Naval Research Laboratory, Stennis Space Center, MS; W.E. Rogers, Planning Systems, Inc., Stennis Space Center, MS; W.C. O'Reilly, Naval Postgraduate School, Monterey, CA</i>	389
H3 Implications of Friction Velocity on Air-Sea Coupled Dynamics; <i>William M. Perrie, L.Wang, B. Toulany, and J. Yang, Bedford Institute of Oceanography, Nova Scotia, Canada</i>	404

*abstract only - full paper not available

H4	A Bi-directional Coupling Between an Atmospheric Model and an Ocean Wave Model Part 1: Atmospheric Aspects; <i>Serge Desjardins, J. Mailhot, L.J. Wilson, Atmospheric Environment Service, Dorval, Quebec, Canada; R. Lalebeharry, Atmospheric Environment Service, Downsview, Ontario, Canada</i>	406
H5	A Bi-directional Coupling Between an Atmospheric Model and an Ocean Wave Model Part 2: Ocean Wave Aspects; <i>Roop Lalebeharry, Atmospheric Environment Service, Dorval Quebec, Canada; S. Desjardins, J. Mailhot, L. J. Wilson, Atmospheric Environment Service, Dorval, Quebec, Canada</i>	413

Session I: Model Integrations and Applications

I1	The Effect of the Sea Floor Erosion on Wave Hindcasting in Coastal Areas of Bohai Sea, <i>Li Luping, First Institute of Oceanography, SOA, Qingdao, China</i>	421
I2	Activities of the WISE Group; <i>Leo H. Holthuijsen, Delft University of Technology, Delft, The Netherlands and L. Cavaleri, Instituto Studio Diamica Grandi Masse, Venice, Italy</i>	433
I3	Winter Conditions of the Wave Activity at Rio de Janeiro Simulated by Numerical Wave Models; <i>Valdir Innocentini, Instituto Nacional de Pesquisas Espaciais, Sao Jose dos Campos, Brazil and E.S.C. Neto, Instituto de Pesquisas Meteorologicas, Bauru, Brazil</i>	438
I4	Estimation of Extreme Heights of Wind Waves in the Coastal Sea Area; <i>Igor Lavrenov, V.N. Bokov, V.I. Dymov, T.A. Pasechnik, N.P. Yakovleva, Arctic and Antarctic Research Institute State Scientific Center of the Russian Federation, I.N. Davidan,, State Oceanography Institute, St. Petersburg, Russia</i>	439
I5	Probabilistic Description of Crest Heights of Ocean Waves; <i>Sverre Haver Statoil, Exploration and Production Technology and D. Karunakaran, Sintef, Civil and Environmental Engineering</i>	451
I6	Wave Hindcasting and Forecasting: Their Role in Ensuring the Safety of Personnel Involved in Offshore Oil and Gas Exploitation; <i>Donald Smith, Offshore Safety Division of the UK Health and Safety Executive, Mersyside, United Kingdom</i>	467
I7	An Assessment of Wave Modeling Technology; <i>Vincent J. Cardone, Oceanweather, Inc. Cos Cob, CT and D.T. Resio, U.S. Army Engineer Waterways Experiment Station, Vicksburg, MS</i>	468

Session P: Poster/Display

P1	Interaction of Sea and Swell in Ocean Wave Models; <i>Charles L. Vincent and D.T. Resio, USAE Waterways Experiment Station, Vicksburg, MS</i>	P1
P2	Implications of Exact Solutions to the Nonlinear Wave-Wave Interaction Source Function; <i>Robert E. Jensen and D.T. Resio, USAE Waterways Experiment Station, Vicksburg, MS</i>	P2

*abstract only - full paper not available

P3	Evaluation of Shallow Water Wave Prediction over the Inner Shelf with HF Radar and In-Situ Measurements; <i>Hans C. Graber, University of Miami, Miami, FL; R.E. Jensen, USAE Waterways Experiment Station, Vicksburg, MS; Herbers, T.H.C., Naval Postgraduate School, Monterey, CA</i>	P3
P4	Nested Wave Model for the Baltic Sea; <i>Lennart Funkquist, Swedish Meteorological and Hydrological Institute, Norrkoping, Sweden</i>	P4
P5	Directional Spreading of Measured and Hindcasted Wave Spectra, <i>George Z. Forristall, Shell International E&P Company; J.A. Greenwood, Oceanweather, Inc., Cos Cob, CT</i>	P5

***abstract only - full paper not available**
