

## TABLE OF CONTENTS

ACKNOWLEDGMENTS .....	iii
AUTHOR INDEX .....	iv

### Session A: Wind Estimations

Chair: Vincent Cardone, Oceanweather, Inc.

<b>A1</b>	<b>The AES40 North Atlantic Wave Reanalysis: Validation and Climate Assessment;</b> <i>Val R. Swail, Environment Canada, Ontario, Canada, E.A. Ceccacci and A.T. Cox., Oceanweather, Inc., Cos Cob, CT</i> .....	1
<b>A2</b>	<b>Effect of Wind Estimation Method on Long Term Wave Hindcast at the Coastal Area around Japan;</b> <i>Masataka Yamaguchi, Yoshio Hatada, and Hirokazu Nonaka, Ehime University, Ehime Prefecture, Japan</i> .....	16
<b>A3</b>	<b>Improving Wind Input Information for Great Lakes Wave Hindcast Study;</b> <i>Lihwa Lin and Donald T. Resio, U.S. Army Engineer Research and Development Center, Vicksburg, MS</i> .....	29

### Session B: Wave Measurements

Chair: Andrew Laing, The National Institute of Water and Atmospheric Research

<b>B1</b>	<b>Airborne Optical Measurements for Estimating Directional Wave Spectra, Currents and Water Depth;</b> <i>J.Z. Williams, C.C. Piotrowski,, J.P. Dugan, and D.C. Campion, Areté Associates, Arlington, VA</i> .....	44
<b>B2</b>	<b>Wave Information Inferred from Synthetic Aperture Radar Images Used to Improve Numerical Simulation of Directional Wave Spectra in the Coastal Zone;</b> <i>F.J. Ocampo-Torres and P. Rosales, CICESE, Ensenada, BC, Mexico</i> .....	*55
<b>B3</b>	<b>Bi-modal Directional Distribution of Ocean Waves in Mixed Seas;</b> <i>David W. Wang, Paul A. Hwang, James M. Kaihatu, and W. Erick Rogers, Naval Research Laboratory, Stennis Space Center, MS</i> .....	56
<b>B4</b>	<b>Validation of the Doppler Shifted Dispersion Relation for Waves in the Presence of Strong Tidal Currents, using ADCP Wave Directional Spectra and Comparison Data;</b> <i>B. Strong, and B. Brumley, RD Instruments, San Diego, CA; E.A. Terray, Woods Hole Oceanographic Institution, Woods Hole, MA; Nicholas C. Kraus, U.S. Army Engineer Research and Development Center, Vicksburg, MS</i> .....	65
<b>B5</b>	<b>Measurement of Wave Field Histories in Hydraulic Models Using Phase Profilometry;</b> <i>Cary Cox, Barry McCleave, James Troupe, Charles R. Welch, William Seabergh, and William Curtis, U.S. Engineer Research and Development Center, Vicksburg, MS</i> .....	74

\*abstract only – full paper not available

#abstract only – if received in time will appear at back of book

**Session C: Performance of Existing Prediction Systems**

**Chair: Al Osborne, University of Torino**

<b>C1</b>	<b>Wave Modelling in Archipelagic Seas: The Aegean Sea Case;</b> <i>S. Christopoulos and C. Koutifas, Aristotle University of Thessaloniki, Thessaloniki, Greece</i> .....	<b>*84</b>
<b>C2</b>	<b>Providing Operational Wave/Surf Support During NATO Exercise Linked Seas 2000;</b> <i>Richard A. Allard, Naval Research Laboratory, Stennis Space Center, MS; Michael Brooking, James Dykes, Naval Oceanographic Office, Stennis Space Center, MS; Kelley Miles, Sverdrup Technology Inc., Stennis Space Center, MS</i> .....	<b>85</b>
<b>C3</b>	<b>Comparison of Two Years Wind and Wave Hindcast via WAM Based Operational Forecasting System Versus Field and Other Models Data;</b> <i>I. Gertman, L. Raskin, and D. S. Rosen, Israel Oceanographic &amp; Limnological Research, Haifa, Israel; and S. Kariel, Israel Defense Forces, Tel Aviv, Israel</i> .....	<b>91</b>
<b>C4</b>	<b>Evaluation of the CMC Regional Wind and Wave Forecasting System During A 3-Year Period;</b> <i>Roop Lalbeharry, Meteorological Service of Canada, Ontario, Canada</i> .....	<b>99</b>
<b>C5</b>	<b>Wind Wave Forecasting on the Great Lakes;</b> <i>Weimin K. Luo, Roop Lalbeharry, and Laurie Wilson, Meteorological Service of Canada, Ontario, Canada</i> .....	<b>114</b>
<b>C6</b>	<b>A Wave Modelling Study of an Intense Storm in Bass Strait, Australia;</b> <i>Diana J. Greenslade, Bureau of Meteorology Research Centre, Melbourne, Australia</i> .....	<b>127</b>

**Session D: Wave Prediction for Tropical Systems**

**Chair: Linwood Vincent, Office of Naval Research and Naval Research Laboratory**

<b>D1</b>	<b>Determination of Oceanographic Risks from Hurricanes on the Mexican Coast;</b> <i>R. Silva, G. Diaz, A. Contreras, G. Bautista, and C. Sanchez, Instituto de Ingenieria, Mexico</i> .....	<b>137</b>
<b>D2</b>	<b>Coupled Ocean Wave-Atmosphere Simulation using the Navy's COAMPS;</b> <i>James D. Doyle, Naval Research Laboratory, Monterey, CA</i> .....	<b>152</b>
<b>D3</b>	<b>Operational System for the Prediction of Tropical Cyclone Generated Winds and Waves;</b> <i>Andrew T. Cox and Vincent J. Cardone, Oceanweather, Inc., Cos Cob, CT</i> .....	<b>158</b>
<b>D4</b>	<b>Numerical Experiments on Predicting Hurricane Generated Wind Waves;</b> <i>Yung Y. Chao and Hendrik L. Tolman, National Centers for Environmental Prediction, NOAA, Camp Springs, MD</i> .....	<b>167</b>

\*abstract only – full paper not available

#abstract only – if received in time will appear at back of book

**Session E: Wave Climate: Estimation and Implication I**

**Chair: Val Swail, Environment Canada**

<b>E1</b>	<b>Design Wave Evaluation for Coastal Protection Structures in the Wadden Sea; Hanz D. Niemeyer, Ralf Kaiser, and Bettina Weiler, Coastal Research Station of the Lower Saxon Central State Board for Ecology, East Frisia, Germany .....</b>	<b>180</b>
<b>E2</b>	<b>Wave Climate Studies for the Southern Indian Ocean; R. Douglas Scott and Tad Murty, Baird and Associates Coastal Engineers Ltd., Ontario, Canada and Rob Del Core, Hydrogenics, Ontario, Canada .....</b>	<b>193</b>
<b>E3</b>	<b>An Approach Towards a 40-year High-Resolution Wave Hindcast for the Southern North Sea; Ralf Weisse and Gerhard Gayer, GKSS Research Center, Geesthacht, Germany .....</b>	<b>204</b>
<b>E4</b>	<b>Specification of Global Wave Climate: Is This The Final Answer?; Vincent J. Cardone, Andrew T. Cox, Oceanweather, Inc., Cos Cob, CT; Val R. Swail, Environment Canada, Ontario, Canada .....</b>	<b>211</b>

**Session F: Wave Climate: Estimation and Implication II**

**Chair: Donald Resio, U.S. Army Engineer Research & Development Center**

<b>F1</b>	<b>An Efficient Approach to Wave Climate Analysis in Coastal Waters; Mauro Sclavo, CNR-ISDGM, Venice, Italy; G.A. Athanassoulis, Department of Naval Architecture &amp; Mar. Engng., Athens, Greece; S. Barstow, Oceanor, Trondheim, Norway; Luigi Cavaleri, CNR-ISDGM, Venice, Italy .....</b>	<b>224</b>
<b>F2</b>	<b>Joint Distribution for Waves and Current in the Northern North Sea; Kenneth Johannessen, Einar Nygaard, Sverre Haver, Per Strass, Statoil, Stavanger, Norway .....</b>	<b>236</b>
<b>F3</b>	<b>Integrating Metocean Models with Structural Response Models; Don Smith, UK Health and Safety Executive, London, UK .....</b>	<b>*243</b>
<b>F4</b>	<b>Rapidly Simulated Ship Buoyancy and Wake in Waves, from Graphics Hardware; Anthony B. Williams, Independent Consultant, Monterey, CA .....</b>	<b>244</b>
<b>F5</b>	<b>Comparison of Hindcast Results and Extreme Value Estimates for Wave Conditions in the Hibernia Area: Grand Banks of Newfoundland; E.P. Berek, Metocean, Coastal, and Offshore Technologies, LLC, Flower Mound, TX, Vincent J. Cardone, Oceanweather, Inc., Cos Cob, CT; Val R. Swail, Meteorological Service of Canada, Ontario, Canada .....</b>	<b>250</b>

\*abstract only – full paper not available

#abstract only – if received in time will appear at back of book

**Session G: Deep Model Formulation I**

**Chair: Paul Wittmann, Fleet Numerical Meteorology and Oceanography**

<b>G1</b>	<b>One Year Comparison of Wave Hindcasts by Backward Ray Tracing Model and WAM; Yoshio Hatada, Masataka Yamaguchi, Hirokazu Nonaka, Ehime University, Ehime Prefecture, Japan</b> .....	261
<b>G2</b>	<b>Long-Range Swell Forecasting Using Source Term Output From Global Wave Models; William C. O'Reilly, U.S. Naval Postgraduate School, Monterey, CA; Paul Wittmann, Fleet Numerical Meteorology and Oceanography Center, Monterey, CA</b> .....	*271
<b>G3</b>	<b>Spectral Partitioning as a Wave Hindcast Validation Tool; Jeffery L. Hanson, The John Hopkins University, Laurel, MD</b> .....	*272
<b>G4</b>	<b>A Discussion on the Directional Distribution of Wind-Generated Ocean Waves; Paul A. Hwang, David W. Wang, W. Erick Rogers, and James M. Kaihatu, Naval Research Laboratory, Stennis Space Center, MS</b> .....	273

**Session H: Deep Model Formulation II**

**Chair: Roop Lalbeharry, Meteorological Service of Canada**

<b>H1</b>	<b>Investigations of Swell Effects on Directional Characteristics of Wind Waves Using Phase-Resolved Nonlinear Models; James M. Kaihatu, David W.C. Wang, Paul A. Hwang, and W. Erick Rogers, Naval Research Laboratory, Stennis Space Center, MS</b> .....	280
<b>H2</b>	<b>Modeling Bimodal Wind-Wave Propagation Resonance; W. Erick Rogers, Paul A. Hwang, James M. Kaihatu, David W.C. Wang, Naval Research Laboratory, Stennis Space Center, MS</b> .....	290
<b>H3</b>	<b>Extreme Northerly Wind Storms in the Eastern Mediterranean Basin and Their Wave Impact in Deep Water in Haifa Bay; Yochanan Kushnir, Lamont-Doherty Earth Observatory of Columbia University, Palisades, NY; Michael Stiassnie, Dmitry Kunitsa, Michael Glzman, Israel Institute of Technology, Technion, Haifa, Israel</b> .....	298
<b>H4</b>	<b>Impact of A Saturation-Dependent Dissipation Source Term on the Skill of an Operational Wind-Wave Model; Jose Henrique G.M. Alves and Michael L. Banner, University of New South Wales, Sydney, Australia; Diana Greenslade, Bureau of Meteorology Research Centre, Melbourne, Australia</b> .....	306

**Session I: Shallow Model Formulation I**

**Chair: W. Erick Rogers, Naval Research Laboratory**

<b>I1</b>	<b>Delft3D Nearshore Wave and Current Predictions Compared with Field Observations; LCDR Bruce Morris and Edward B. Thornton, Naval Post Graduate School, Monterey, California</b> .....	*318
<b>I2</b>	<b>Intercomparison of Different Bottom Friction Formulations in Extreme Shallow Water Regions; Roberto Padilla-Hernandez and Jaak Monbaliu, Katholieke Universiteit Leuven, Heverlee, Belgium</b> .....	319

\*abstract only – full paper not available

#abstract only – if received in time will appear at back of book

13	<b>Swell Propagation in Shallow Water; Fabrice Ardhuim, Thomas H.C. Herbers, and William C. O'Reilly, Naval Post Graduate School, Monterey, California .....</b>	330
14	<b>Bed Form Response to Wave and Current Forcing During the Shoaling Waves Experiment, SHOWEX; Timothy P. Stanton, Naval Post Graduate School, Monterey, California .....</b>	#340
15	<b>Near Shore Bore Propagation and Splashing Processes: Gridless Simulations; A. Colagrossi and M.P. Tulin, Ocean Engineering Laboratory, Roma, Italy and M. Landrini, INSEAN, The Italian Ship Model Basin, Italy .....</b>	341

**Session J: Shallow Model Formulation II**

**Chair: William C. O'Reilly, U.S. Naval Postgraduate School**

J1	<b>Development of a New Source Term for Wave Breaking in Shallow Water; David Hurdle and Gerbrant van Vledder, Alkyon Hydraulic Consultancy &amp; Research, Emmeloord, The Netherlands .....</b>	354
J2	<b>Oceanic and Near-Shore Whitecapping Effects in SWAN; L.H. Holthuijsen and N. Booij, Delft University of Technology, Delft, The Netherlands .....</b>	362
J3	<b>Benchmark Tests of STWAVE; Jane McKee Smith, U.S. Army Engineer Research and Development Center, Vicksburg, MS .....</b>	369
J4	<b>Application and Validation of the Navy Standard Surf Model: SURF 3.1; Theodore R. Mettlach, Neptune Sciences, Inc., Slidell, LA; Y. Larry Hsu, Naval Research Laboratory, Stennis Space Center, MS; Marshall D. Earle, and Daniel Osiecki, Neptune Sciences, Inc., Slidell, LA .....</b>	380
J5	<b>Use of Coupled Wave Models to Simulate Near Shore Waves, C.S. Wu, National Weather Service, Silver Spring, MD and O.G. Nwogu, Stevens Institute of Technology, Hoboken, NJ .....</b>	*392

**Session K: Shallow Model Formulation III**

**Chair: Nico Boij, Delft University**

K1	<b>Wind Waves and Swell in Los Angeles Bay; V. Kalmykov and Reid Nichols, Marine Information Resources Corporation, Ellicott, Maryland .....</b>	393
K2	<b>Application of SWAN in Mississippi Sound; Y. Larry Hsu, W. Erick Rogers, James M. Kaihatu and Richard A. Allard, Naval Research Laboratory, Stennis Space Center, MS ....</b>	398
K3	<b>Nonlinear Mechanisms in a Harbor/Coastal Wave Transformation Model: Enhancements to CGWAVE; Vijay Panchang, W. Chen, L. Zhao, University of Maine, Orono, Maine; Z. Demirbilek, U.S. Army Engineer Research &amp; Development Center, Vicksburg, MS .....</b>	*404
K4	<b>Reflection and Transmission of Waves near Blocking; Ashwini K. Otta, Splash Hydrodynamics, Marknesse, The Netherlands .....</b>	405

\* abstract only – full paper not available

#abstract only – if received in time will appear at back of book

**Session L: Nonlinear Wave Phenomena**

**Chair: Robert Jensen, U.S. Army Engineer Research & Development Center**

<b>L1</b>	<b>Improved Method for Obtaining the Integreation Space for the Computation of Nonlinear Quadruplet Wave-Wave Interactions;</b> <i>Gerbrant van Vledder, Alkyon Hydraulics Consultancy &amp; Research, Emmerloord, The Netherlands</i> .....	418
<b>L2</b>	<b>A Study of Long Wave and Short Wave Interactions by Using A New Spectrum Model;</b> <i>Ray-Qing Lin, Naval Surface Warfare Center, West Bethesda, MD; and Weijia Kuang, University of Maryland, West Bethesda, MD</i> .....	432
<b>L3</b>	<b>Effect of Wind Wave Spectrum Fluctuation on Non-Linear Spectrum Evolution;</b> <i>I.V. Lavrenov, Arctic and Antarctic Research Institute, St. Petersburg, Russia</i> .....	438
<b>L4</b>	<b>Some New Results of Non-Linear Energy Transfer in Wind Wave Spectrum;</b> <i>I.V. Lavrenov, Arctic and Antarctic Research Institute, St. Petersburg, Russia</i> .....	443
<b>L5</b>	<b>On Conservation of the Constants of Motion in the Models of Nonlinear Wave Interaction,</b> <i>Andrei Pushkarev and Vladimir Zakharov, Waves and Solutions, LLC, Gilbert, ZA</i> .....	456
<b>L6</b>	<b>Nonlinear Dynamics of Rogue Waves;</b> <i>M. Onorato, A.R. Osborne, and M. Serio, University of Torino, Torino, Italy</i> .....	470
<b>L7</b>	<b>Wind Waves Sources Terms: Constraints Related to Nonlinear Energy Fluxes,</b> <i>Donald T. Resio, Chuck Long, and Barbara Tracy, U.S. Army Engineer Research and Development Center, Vicksburg, MS and C. L. Vincent, Naval Research Laboratory, Stennis Space Center, MS</i> .....	480

**Poster Session**

<b>P1</b>	<b>A Nowcast Tool to Assess Wave Parameters in Coastal Areas;</b> <i>Carlos Ventura Soares, Instituto Hydrografico, Lisboa, Portugal; Eugen Rusu, Galati University, Romania, Portugal; and Emanuel F. Coelho, Instituto Hydrografico, Lisboa, Portugal; Antonio A. Pires Silva, Instituto Superior Tecnico, Lisboa, Portugal; Oleg Makarynskyy, Odessa Hydrometeorological Instittue, Ukraine, Portugal</i> .....	P1
<b>P2</b>	<b>A Long-Term Wave Hindcast for the New Zealand Coast:</b> <i>Richard Gorman, The National Institute of Water and Atmospheric Research, Hamilton, New Zealand and Andrew Laing, The National Institute of Water and Atmospheric Research, Wellington, New Zealand</i> .....	P12
<b>P3</b>	<b>High Rates of Wave Growth from Storms Affecting the East Coast of New Zealand,</b> <i>Andrew Laing, The National Institute of Water and Atmospheric Research, Wellington, New Zealand and Richard Gorman, The National Institute of Water and Atmospheric Research, Hamilton, New Zealand</i> .....	P21

\*abstract only – full paper not available

#abstract only – if received in time will appear at back of book

<b>P4</b>	<b>The Perils of Coastal Wave Simulations in High Latitude Domains Using 3G Spectral Wave Modeling, Robert E. Jensen, U.S. Army Engineer Research and Development Center .....</b>	<b>*P31</b>
<b>P5</b>	<b>Theoretical and Observational Study of the Response Wave Directions to Changing Wind Directions for Inhomogeneous Wave Fields, Li Luping, Huang Peiji, and Chen Xueying, First Institute of Oceanography, Qingdao, P.R. China .....</b>	<b>P32</b>
